

MLEP Intermediate GPS Workshop

Exercise Six Managing Data

During this exercise, you will manage the data in the GPS receiver. You will delete a single track and then delete all tracks. You will delete a single route and then delete all routes. Lastly, you will delete a single waypoint and then delete all waypoints.

Part 1: Delete a single track.

1. Press the <MENU> key twice for the 'Main Menu'

2. Highlight 'Tracks' and press the <ENTER> key again to bring up the 'Tracks' list.

Managing Data

Part 6: Delete all waypoints.

1. As you previously did in Part 5 above, bring up the list of waypoints on your receiver.
2. Press the <MENU> key. Highlight 'Delete All' and press the <ENTER> key. Highlight the 'Yes' button and press the <ENTER> key to confirm your choice to delete all waypoints.

3. As you return to the waypoint listing and see that all the waypoints are gone you will see the message 'NONE FOUND' appears in a box at the bottom of the display and may hear a beep. This message will occur any time you enter the waypoint listing and there are no stored waypoints. To erase the message press the <ENTER> key.

4. **NOTE:** You cannot recover deleted points.
