

Boise, Inc.

Use Truck Route from Hwy 11 or enter 332 from Hwy 53. Turn right at stop sign. Enter scale area on south end of scales, proceed forward to scales. Scales will direct driver to either the deck area (west side of highway) or the East storage yard. When finished unloading, return to scales to scale out.

Boise Scales: 218-285-5412

Boise, Inc. Wood Yard Safety Rules

Required PPE:

- High Visibility Class II Vest
- Safety toe footwear
- Safety glasses with side shields
- Hard Hat

No passengers are allowed beyond the Scale House.

Please note that we also prohibit smoking and jewelry, including rings, on Boise property.

Channel 19 is used for all wood yard communication. Please give the operator your 3 digit number from your yard pass.

We require a 12" bunk if using a flatbed to haul tree-length wood.

Driver location when being unloaded:

- Tree-length roundwood – 25' in front of truck
- 100" roundwood – inside truck

CENTER-MOUNT TRUCKS ONLY:

Please position your main boom up and secondary boom down when being unloaded. Truck driver must stay in the truck while being unloaded. Make sure boom is down before leaving the unloading area.

All bark must be swept off of roundwood trucks prior to leaving mill in designated areas only. Bark material swept off in our landing areas degrades the gravel.
